## 10334 Ray Through Glasses

Suppose we put two panes of glass back-to-back. How many ways $a_{n}$ are there for light rays to pass through or be reflected after changing direction $n$ times? Following figure shows the situations when the value of $n$ is 0,1 and 2 .

## Input

It is a set of lines with an integer $n$ where $0 \leq n \leq 1000$ in each of them.

## Output

For every one of these integers a line containing $a_{n}$ as described above.

## Sample Input

0
1
2

## Sample Output

1
2
